The thesis explores identity components (blue heritage and composition of petroleumscape) of Skikda (Algeria) in order to integrate them, under aegis of SD, in the development strategy of its port-city interface. In this regard, the sustainability of Skikda's oil ports

development scenarios will be assessed using the Boussole 21 a digital decision-making tool , as a manifestation of smart thinking, and for promoting the blue economy dominated by black gold in Skikda, in view of Skikda's transition to a smart port city.
